SUMMARY

Senior UX/UI Designer with 9+ years across food-tech, fintech, and enterprise SaaS. I lead a team of 12 designers and handle both UX and UI end to end — research, user flows, usability testing, interface design, and design systems — for clients including KFC, Pizza Hut, EMAAR, and Hero FinCorp. I build the design systems and working habits that let a team ship consistently at pace.

EXPERIENCE

Design Lead (Associate Team Lead) — Appinventiv, Noida

Apr 2024 – Present

- Lead a team of 12 designers, running design reviews and managing delivery across client projects that run at the same time.
- Delivered 50+ end-to-end RFP design projects on schedule, from first pitch through to solutioning.
- Built a three-tier design token system now used across product teams, which cut the back-and-forth between design and development.
- Work with PMs, developers, and BAs to settle open questions before handoff, so less comes back for rework afterwards.
- Brought AI tools into the team's daily workflow to speed up production without losing quality.
